

Setup Desire MasterNodes

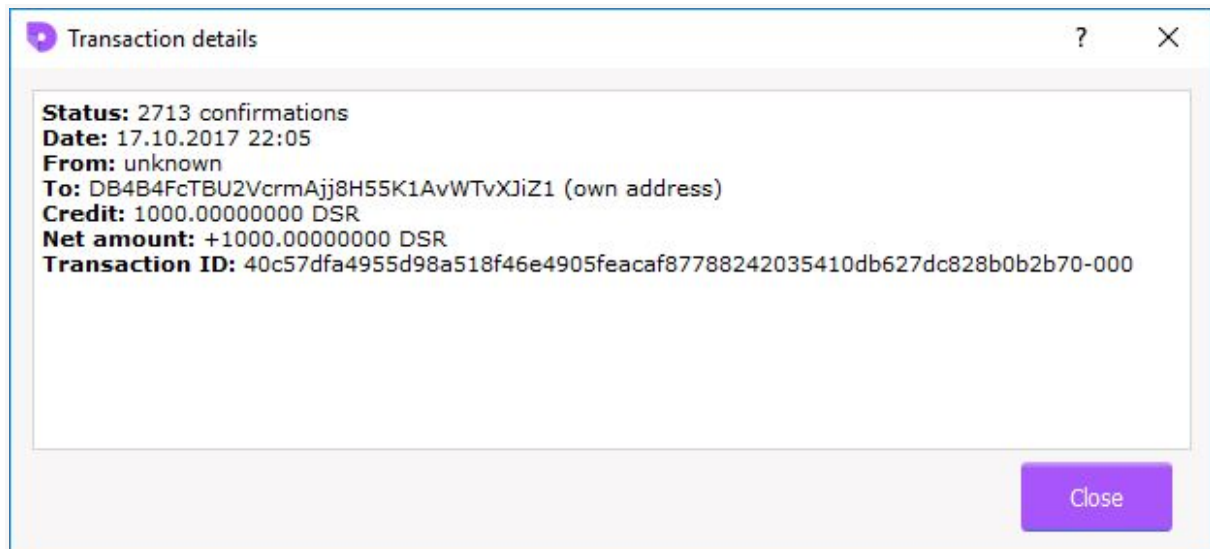

Step 1.

Download and run the latest Desire Wallet

<https://github.com/lazyboozer/Desire/releases/>

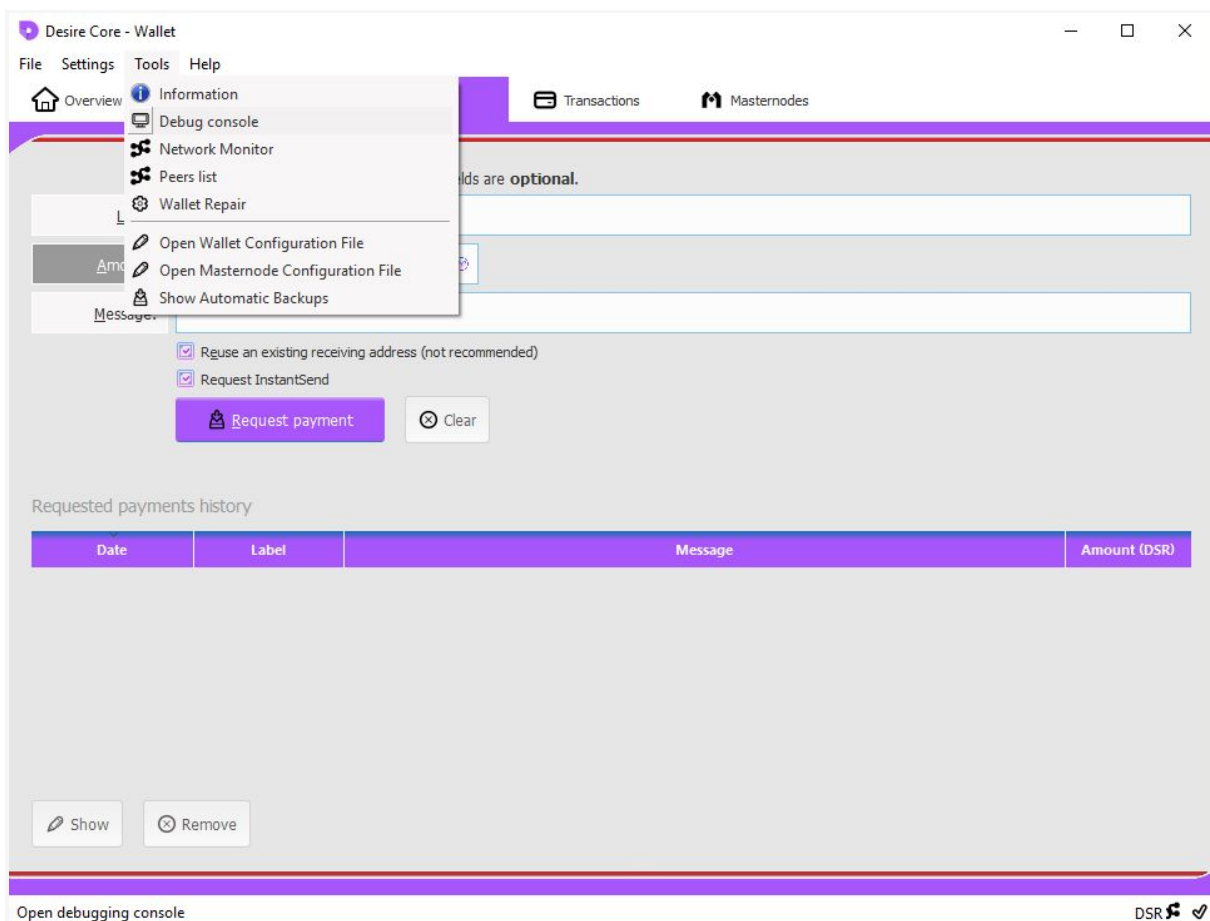

Send 1000 DSR to your address and wait for 15 network confirmations.

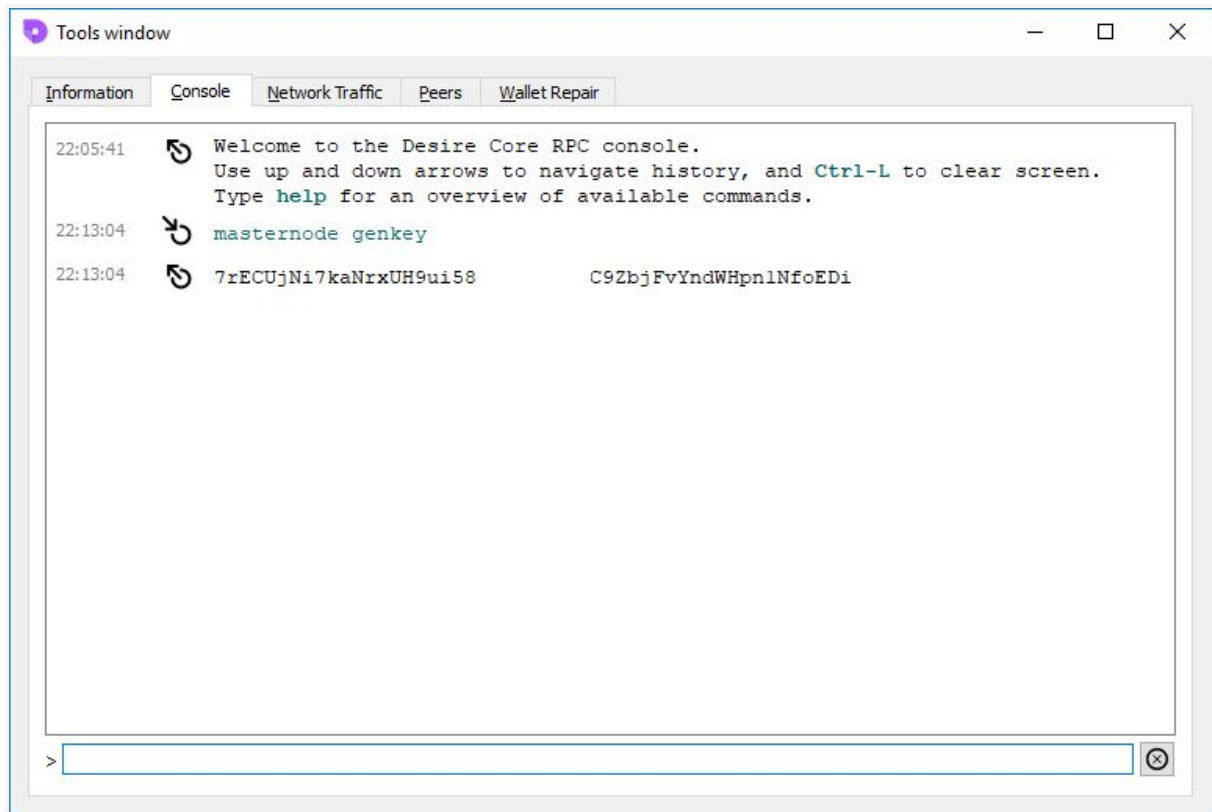

Step 2.

Open Tools -> Debug Console

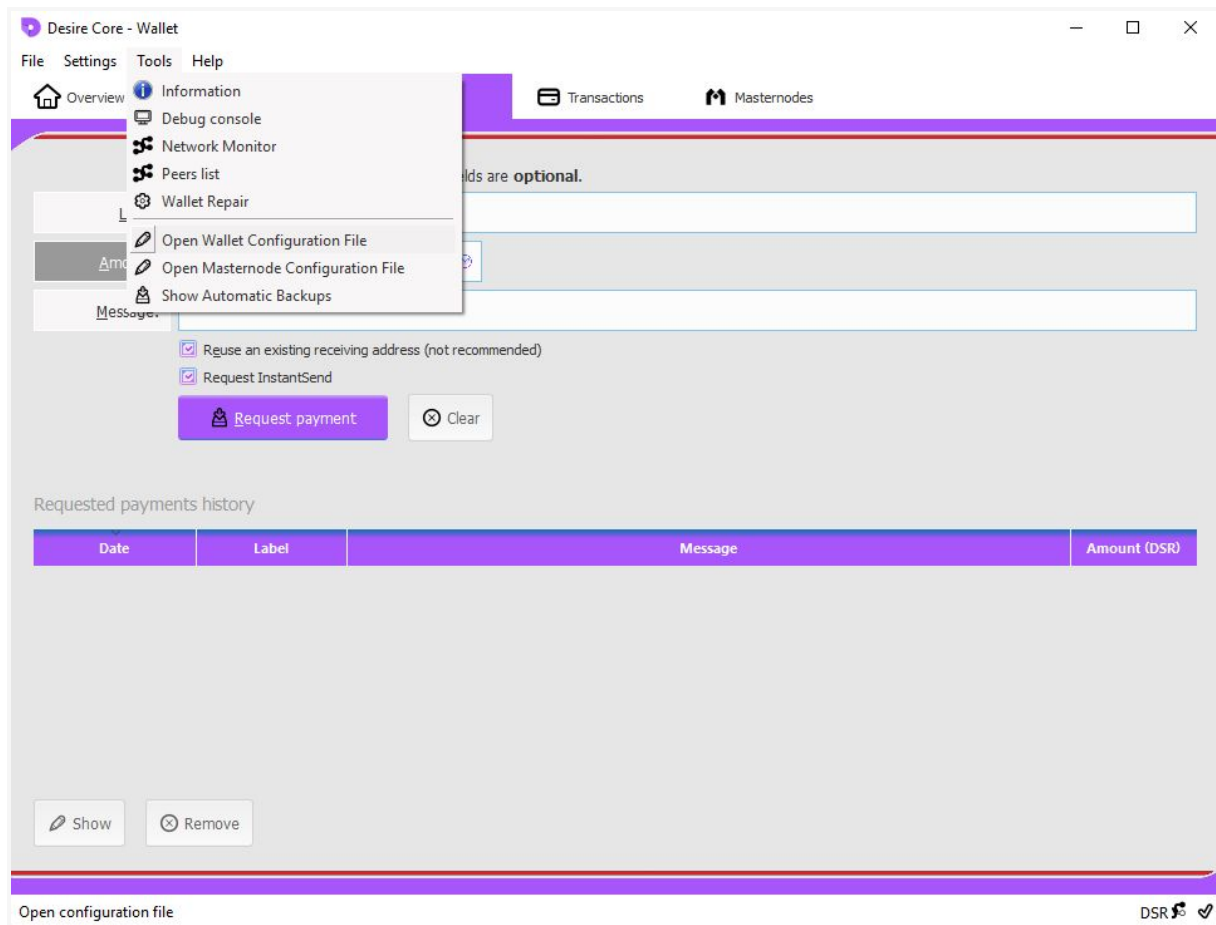

In the Console window enter `masternode genkey` and save result. This is your masternode private key, for the first address of your wallet.

Step 3.

Open Tools -> Open Wallet Configuration File.

Open the file in Notepad and paste in the following:

Code:

`masternode=1`

`masternodeprivkey=7rECUjNi7kaNrxUH9u***9ZbjFvYndWHpn1NfoEDi`**

`externalip=you IP adress`

Save file.

Step 4.

Restart wallet and open Tools -> Debug Console

In the Console window enter masternode start

Masternode successfully started!!!
